

# UTeach is 20!

Get Involved. Support UTeach.

**We are recognizing the national impact of UTeach programs and STEM teachers with a yearlong celebration!**

UTeach is one of the top five producers of STEM teachers in the country.

- 45 UTeach programs across the U.S.
- 6,800 students enrolled
- 3,300 graduates
- 86% retained in teaching
- 1 million K–12 students reached

UTeach is raising awareness of the importance of high-quality secondary STEM education with a variety of celebratory activities during 2016–2017, including feature articles and videos highlighting STEM teaching excellence, regional activities and events to honor and recognize UTeach alumni, and a national media campaign highlighting the importance of great STEM teachers. Our celebrations will culminate in May with UTeach Week and the UTeach Conference.

## OPPORTUNITIES FOR SUPPORT

**Many national and local opportunities are available to support UTeach during our yearlong celebration of STEM teachers.**

### Dedicated 20th Anniversary Website and Media

A website, videos, and other collateral materials will celebrate the impact UTeach has made on STEM teacher preparation. All traffic from UTeach partner programs and from the public will be directed to a website featuring interviews with UTeach alumni and students about what it means to teach STEM and with principals who hire and love our graduates. Receive recognition as a STEM education supporter on the website and in videos and other materials used nationwide.

### UTeach Week

During National Teacher Appreciation Week (May 1–5, 2017), UTeach programs across the country will host local celebrities and civic leaders teaching STEM lessons in their schools. Provide grant awards to UTeach programs and local schools to support this event.

### 2017 UTeach Conference

Our anniversary celebrations will culminate in May 2017 with three days of learning and networking with teachers, universities, and funders from across the nation. Sponsor speakers and conference events.

### National DonorsChoose and Think It Up Campaigns

Recognize and support the amazing work of the national network of UTeach STEM teachers by providing matching funds for projects in their classrooms. These projects will launch in Spring 2017.

**ABOUT UTEACH**

UTeach is a unique university-based secondary STEM (science, technology, engineering, math) teacher preparation program that answers the critical need for qualified STEM teachers in Texas and across the country. With its nationally scalable program for universities, UTeach is producing a rapidly growing number of teachers who are educating tomorrow's scientists and engineers to play a vital role in America's economic growth.

**National Recognition**

UTeach was highlighted as a promising program by the National Academies of Sciences, Engineering, and Medicine and by the President's Council of Advisors on Science and Technology.

President Barack Obama cited UTeach as a way that universities can educate the next generation of scientists and mathematicians.

The White House recognized UTeach for its exemplary preparation of mathematics and science teachers in connection with the Howard Hughes Medical Institute grant to replicate UTeach at 10 additional universities.

**Critical UTeach Components**

- A compact degree plan that allows students to graduate in four years with a degree in their major and secondary STEM teacher certification.
- Flexible entry points for undergraduate, post-baccalaureate, and nontraditional students.
- Partial tuition reimbursement to try out teaching.
- Early field experience that places students in classrooms during their first semesters.
- Paid internships at schools and nonprofit organizations to reinforce the students' experience and commitment to teaching.
- Master teachers with backgrounds in public school teaching and leadership to guide students through a sequence of field experiences.
- Inquiry-based instruction to enhance student mastery of STEM course content.
- In-service mentor teachers who work closely with students in their field placement.
- Mentoring and support for the first two years of teaching.
